POLICY 101

Board Vision, Mission & Values

The Board recognizes the value of clearly articulated statements of its Vision, Mission, and Values. These statements reflect the unique character of our community and provide guidance in governance, policy development, and goal-setting for the school.

Vision

To make our school as the community's choice for Montessori learning experience in Regina.

Mission

The Montessori School of Regina strives to create a respectful, peaceful Montessori community, where students can nurture and grow their unique talents and develop a foundation for lifelong, independent learning.

Values

Educational Excellence

We value the leveraging of the Montessori philosophy to provide a safe and nurturing environment for each student to learn and grow in all aspects of the child – emotional, social and formal education. We are committed to ensuring that all faculty and staff training is current and consistent.

Culture

We value building from within and promoting a continuous learning environment through mentorship, coaching and regular check ins, and ensuring that our faculty and staff have the access that they need to support structures. Employee engagement and growth are key factors to our success.

Community

We value our community and a school culture that is welcoming, caring, and safe. We understand that contributing to the community at large, fostering a positive atmosphere within the community, and collaborating with other community groups is the best way to achieve this. This includes highlighting our community initiatives externally and offering parents education initiatives.

Sustainability

We value maintaining strong professional relationships with the community and other resources, and ensuring that we perform regular due diligence to sustain strong financial and operational stability.

Growth

We value continuing growth of our student population and programming, and the requisite facilities required to maintain such growth. Consistent growth in enrolment, enhanced classroom programming, and engaging before and after school programming are all part of growth planning.
